

Your Trusted Partner in Ocean Shipping and Beyond

TIPS CO., LTD.
TERMINAL NO. B4,
LAEM CHABANG PORT,
THAILAND

Our Company

TIPS was founded in 1991 as a joint venture, with majority investments by domestic and international shipping companies.

Located in Laem Chabang Port, one of the leading maritime ports in Thailand, TIPS has firmly established its position as one of Thailand's leading container terminal operators. B4 is perfectly suited to providing world-class terminal operations. Ideally situated at the centre of international trade for the Eastern seaboard, it is Thailand's premier gateway to the world. Our proven excellence in service is backed by a sincere dedication to our customers and the understanding that being on the cutting edge of developments in services, facilities, equipment, and technology allows us to serve you better.

TIPS has expanded beyond terminal operations to make one-stop solutions a reality by adapting alongside the global marketplace and our customers' increasingly sophisticated requirements. Opened in 2008, TIPS CD1 is a modern, expansive, and conveniently located container depot – a seamless extension of B4. The newest addition, TIPS Warehouse, has been fully operational since January 2012 and has added a complete suite of warehousing and distribution services to the TIPS portfolio.

In 2022, TIPS have fully began its operation of **Single Rail Transfer Operator (SRTO)** in Laem Chabang Port. The project aims to develop the infrastructure and facilities for serving the discharging and loading containers transported by rail to the port area. The operations provide a route to effectively reduce in-port traffic congestions by facilitate container transport by rail to and from Laem Chabang Port.

Our Technology & Equipment

Investing in the latest top-of-the-line innovations in computer systems and equipment enables TIPS to offer the consummate service quality that you need to maximize your productivity. When it comes to technology, we don't make any compromises – we accept no less than the best. All TIPS properties run on Navis SPARCS N4, equipped with EDI management capability for seamless communication and unsurpassed efficiency.

B4 With over 20 years of experience in the container terminal business, TIPS knows exactly what it takes to operate an industry-leading container terminal. At B4, we've not only developed a skilled and professional team of experts that can address your every need, but we've also invested in the cutting-edge technology and equipment they need to provide service that's simply unbeatable.

Our twin-lift gantry cranes can meet the requirements of operations on post-Panamax vessels while improving their operational efficiency. Furthermore, our advanced rubber-tyred gantries, prime movers, reachstackers, empty container handlers and other container handling equipment are designed to provide high levels of efficiency and productivity.

Three inbound gates with automatic weighing machines and three outbound gates, along with our innovative gate management system, provide quicker turnaround times for trucks – meaning less time wasted waiting in line for drivers. In addition to trucking, TIPS has made rail access simple and easy with a road and rail transfer facility that allows TIPS to offer expedient and reliable rail services to and from the Lat Krabang Inland Container Depot in the Bangkok metropolitan area.

SHIP-TO-SHORE GANTRY CRANES

Five high-powered gantry cranes– one Panamax and four post-Panamax – with a maximum lifting capacity of 60 tons and a maximum reach of 18 wide

RUBBER-TYRED GANTRY CRANES

17 RTGs with a wide range of stacking capabilities – 1 over 4: 10 units, 1 over 6: 7 units

REACHSTACKERS

Seven reachstackers, each with a 45 ton lifting capacity, capable of stacking containers five stories high to service laden containers and rail transfers

EMPTY CONTAINER HANDLERS

Two empty container handlers capable of double stacking containers six stories high, designed for maximizing yard efficiency and equipped with environmentally friendly engines

TRACTOR HEADS

Over 52 tractor heads powered with up to 360 BHP engines, built to move containers from berth to yard and back in a seamless, uninterrupted operation

FORKLIFTS

Nine forklifts handle cargo lifting in the CFS, with lift capacities ranging from three to six tons, equipped with cargo tracking devices for fast allocation, storing and retrieval

CD1

We've spared no expense in creating this next-generation container storage facility with the aim of driving our customers' operating efficiency and productivity and ensuring the fastest turnaround times. Taking advantage of TIPS CD1's advanced container depot services ensures your high-volume shippers and consignees of ready container availability and total customer service while reducing costs and enhancing productivity.

Investments in advanced machinery and equipment include empty container handlers and reachstackers capable of lifting single containers and double stacking to increase productivity while reducing fuel consumption and CO_2 emissions. Our 10 empty container handlers are capable of double stacking containers seven stories high. TIPS is also well equipped when it comes to trucks, with 17 chassis and 17 tractor heads with up to 360 BHP engines.

All of the storage area surfaces at TIPS CD1 are paved with reinforced concrete and leveled to maintain stacking stability and accommodate maximum heights. We provide our customers haulage of their empty containers from the B4 terminal and other LCB terminals to TIPS CD1, monitored by a state-of-the-art container management system that allows for constant visibility of containers as well as convenient online booking.

Like all TIPS properties, TIPS CD1 makes the most out of today's cutting-edge technologies. TIPS CD1 utilizes the innovative Navis SPARCS software, which is an unsurpassed leader in container management. We have also implemented SAP, which makes the billing and accounting process a breeze to navigate.

Warehouse

In order to expand our suite of services to better meet our clients' needs, we have made a commitment and investment in TIPS Warehouse. TIPS has pulled out all the stops – infrastructure and equipment are simply top-notch, and our warehousing and distribution service offerings are tailored to suit your needs at every step.

The facility contains a total area of 24,324 sqm (6 acres), which has been well-organized and designed for the most effective utilization. We have the capability to stuff 20-foot, 40-foot and 45-foot containers in both 50 kg bags and jumbo bags – up to 150 containers a day – and provide transportation of laden and empty containers 24 hours a day. In order to offer the top quality stuffing, unstuffing and storage services our clients require, TIPS has invested in only the best equipment, infrastructure and technology.

Nine dock levelers allow for simple and easy stuffing on chassis. 22 forklifts with lifting capacity ranging from 2.5 to 23 tons, as well as two high lift forklift units, operated by

skilled and experienced drivers, ensure that your goods are moved smoothly and safely. Additionally, our tractors and chassis enable us to expedite transportation of your goods to the highest level.

TIPS warehouse runs on a tailor-made warehouse management system that allows for total visibility and control, and our all-encompassing CCTV system helps ensure your goods are safe and secure at all times. The warehouse also utilizes the SPARCS N4 container terminal operating system, which streamlines operations to enhance productivity and minimize turnaround times.

Our Services

TIPS offers round-the-clock vessel and yard operation, container freight station, container depot and warehousing services. We operate in a competitive environment and have established ourselves as the container terminal service provider of choice by consistently meeting productivity goals and continuously working to upgrade the quality of our services, facilities and customer care.

Vessel Operations

With 300 meters of berth space, a 14 meters approach channel and a 14 meters draft at the berth, TIPS can accommodate today's post-Panamax vessels with ease. TIPS provides ship planning, scheduling and coordination services, and we also offer our expertise in container terminal operations to shipping lines, container vessel owners, charterers and operators. By utilizing the state-of-the-art planning and scheduling software Navis SPARCS N4, we can provide our clients with a complete range of services, assuring them of high productivity and efficiency at competitive rates.

Yard Operations

Our container yard services are all backed by the powerful capabilities of Navis software, which helps us manage the entire terminal operation in real-time by providing detailed information and graphical views of container inventories and vessel, rail, crane and container yard activities. Providing you with full visibility of your containerized cargo is just one way TIPS helps ensure the safe and timely delivery of your goods.

Single Rail Transfer Operator (SRTO)

We are currently operating Single Rail Transfer Operator (SRTO) at Laem Chabang Port. SRTO aim to further increase Thailand transport efficiency and reducing cost in in-land shipment. The use of rail service for transferring containers to its destination, road usage, as currently the country's most used method, can be significantly reduced. Higher transport efficiency can be achieved, reducing cost of container shipment, and reducing delays. Our Single Rail Transfer Operator (SRTO) is located in between Wharf B and C, operating on a 960,000 sqm facility. The facility hosts 2 rail mounted gantry cranes and 6 rail tracks that can accommodate up to 12 trains simultaneously.

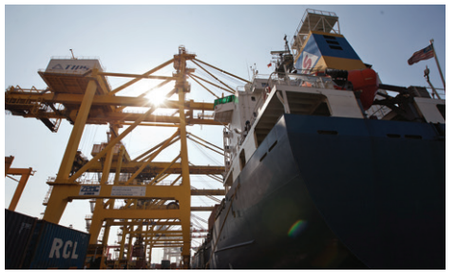

CY2

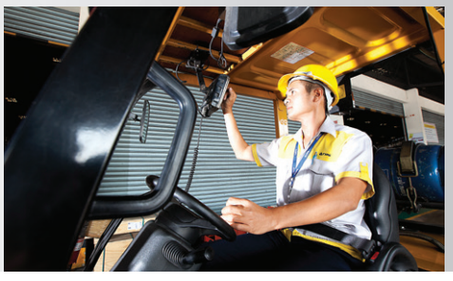

TIPS CY2 was designed to address our customers' growth and need for additional space for containers. CY2's main purpose is to provide extra space for efficient and flexible container management, namely for exports. Conveniently located within Laem Chabang Port, with a total area of 50,240 sqm, TIPS CY2 can hold up to 7,612 TEUs. Furnished with high performance lifting equipment and cutting-edge container management systems, TIPS can handle both laden and empty containers effectively and efficiently.

Container Freight Station

In addition to the traditional container terminal services, TIPS also offers CFS services for inspection, unstuffing and delivery of imports. Our CFS, located within B4 terminal, quickly and efficiently serves both importers and exporters of LCL cargo. Other unique features of the CFS include on-site customs clearance as well as prompt and reliable transshipment of LCL cargo to inland container destinations such as Lat Krabang ICD.

"We're Continuously Working to Upgrade The Quality of Our Services, Facilities and Customer Care."

CD1

Located just a few km from B4, TIPS CD1 is a flagship empty container depot that offers an expansive 112,000 sqm facility with the capacity to store 15,000 TEUs of just about any kind of container you need – 20-foot, 40-foot, 45-foot, high cubes, flatbeds and refrigerated containers. TIPS CD1 is open 24/7 and ensures truck turnaround times of less than 20 minutes. We offer complete one-stop solutions with a full complement of services, such as empty container handling and storage, as well as dry and reefer storage. TIPS CD1 also prepares containers to operator standards, with first-class container maintenance and repair, washing and cleaning.

Warehouse

The newest addition to the TIPS arsenal is TIPS Warehouse. Just a few km from B4 and adjacent to TIPS CD1, the warehouse spans 24,306 sqm and is the ideal choice for effective, convenient and secure cargo storage and distribution. Since its grand opening on the 15th of January 2012, the facility has provided customers with top-notch warehousing and distribution services, such as cargo storage, container stuffing (including 50 kg bags and jumbo bags) and un-stuffing, and transportation of laden and empty containers. In particular, TIPS warehouse can provide specialized skill in stuffing tapioca starch for export. You can count on TIPS to take care of the full loop of stuffing and transport of empty and laden containers.

Safety, Security, Documentation

At TIPS, we aim to lead the industry in offering high-quality services backed by correct and compliant processes. Thus, safety, security, and documentation are at the heart of everything we do. Prioritizing safety and security enables us to provide you with unparalleled excellence in all aspects of our service, from productivity to occupational health and environmental responsibility.

Our operations are implemented according to international standards, specifically in compliance with Partnerships in Environmental Management for the Seas of East Asia's Port Safety, Health, and Environmental Management System (PSHEMS), which aims to set a common standard for the Asian region. In addition, our security protocols, systems, and equipment are fully compliant with the International Ship and Port Security (ISPS) code, as well as Customs-Trade Partnership Against Terrorism (C-TPAT) regulations, and we are ISO 9001:2015, ISO 14001:2015, and ISO 45001:2018 certified.

For added security, TIPS has installed an extensive CCTV system across all our facilities, stationed security guards around-the-clock, and implemented an access control system for all entrances to restricted areas and working areas.

Over time, our commitment to health, safety, security, and the environment has only gotten stronger, and our standards have only gotten stricter. TIPS understands the unwavering dedication necessary to adhere to such stringent standards, but we also understand that making this commitment brings a wealth of benefits. Accordingly, TIPS will never stop developing and enhancing our ideals, from increased operational efficiency and productivity for our valued customers to a healthy and fulfilling work environment for our esteemed employees.

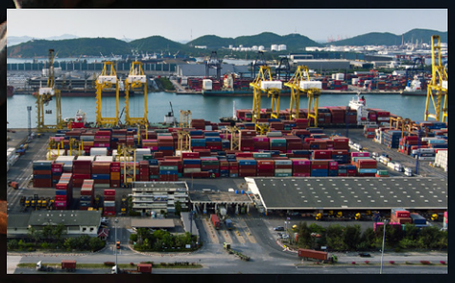

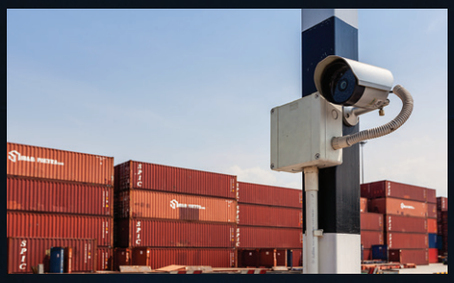

Our continuing dedication to safety has earned us a number of accolades from the Thai Ministry of Labor and Social Welfare:

- **Zero-Accident Campaign Award 2011-2014, Silver Level**
  (no severe accidents for 3,000,000 – 9,999,999 working hours)
- **Zero-Accident Campaign Award 2016-2019, Gold Level**
  (no severe accidents for over 10,000,000 working hours)
- **Zero-Accident Campaign Award 2020-2022, Platinum Level**
  (achieve Gold Level for over five consecutive years)
- **National Occupational Safety and Health Award 2010-2021**

BUSINESS CONTINUITY MANAGEMENT SYSTEM ISO 22301:2019 SIS CERT.

CERTIFIED ISO 9001 · ISO 14001 OHSAS 18001

"Prioritizing safety and security enables us to provide you with unparalleled excellence in all aspects of our service"
